(54) DISPLAY DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a semiconductor display device capable of displaying a picture in clear and desired colors even if a deterioration rate of an organic chemical compound is influenced by the environment.

SOLUTION: The semiconductor display device characterized in that the display pixels and sensor pixels of a light emitting device have respective light emitting elements, the sensor pixels are mounted with light receiving diodes respectively, and the brightness of the light emitting element of each display pixel is controlled according to a current value flowing through the diode.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
